GOTCHA!

REFRIGERATION LEAK TRACER DYE

Chemistry designed for use in detecting refrigerant leaks in A/C and other cooling equipment.

- Harmless to compressors and equipment. SAE J2297 compatible.
- Leaks will glow green when exposed to ultraviolet (blacklight) light.
- Minimize man hours by reducing the time to find refrigerant leaks.
- Concentrated formula that works quickly and cost effectively.
- Universal type works for ALL refrigerant products and compressor oils including PAG, POE and ISO 32 and 68 mineral oils.

USE INSTRUCTIONS:

GOTCHA! Should be used ½ ounce to 8 ounces of refrigeration oil. Circulate and check for leaks with a black light. Dye may be left in the system with no affect on operation.

TECHNICAL DATA:

Form.....Liquid
Color.....Amber as concentrate.....Yellow-Green when diluted
Strength.....Concentrated
pH.....Neutral
Odor.....Oil
