Powder Laser Scale Remover

And Rust Remover

**Chemistry designed for use in spray washer systems
to remove laser scale or rust.**

Powder Laser Scale Remover is a premium product designed specifically for the removal of laser scale oxidation or rust deposits. It is a non acid product that is safe for workers and wash water disposal. The product leaves a clean surface on the metal, ready for further processing after an alkaline wash.

- Not corrosive. Safe for use and disposal.
- Attacks, penetrates and removes laser scale and rust.
- Highly concentrated formula that requires low usage amounts.

USE INSTRUCTIONS:

Add **Powder Laser Scale Remover** at a rate of 2 to 4 ounces per gallon of water. The solution works best in spray cabinet or spray conveyor systems, but can be employed in a soak tank. Temperature of the solution should be maintained between 140° and 180° F. Wash time will vary with the severity of the laser scale or rust deposits, but will range from 2 to 10 minutes for spray systems and 15 to 40 minutes for soak tanks. Following treatment, parts should be washed with an alkaline cleaner to balance the pH of the metal surface.

TECHNICAL DATA:

pH (use level).....4.5 @(10%)
Color.....White Powder
Odor.....Mild
Solubility.....Complete
