

TYSOL RWT-2000GY

Locomotive Radiator Water Treatment

Chemistry designed to protect locomotive cooling systems against corrosion and scaling.

RWT-2000GY is a premium product designed specifically for the protection of locomotive cooling water systems against rust, corrosion and scaling. RWT-2000GY provides value through low cost and high performance.

- Non-corrosive. Safe for use and disposal.
- Prevents corrosion to all metals found in locomotive cooling systems.
- Exceeds ASTM D1384 specifications with EMD modifications.
- Available with a leak tracer dye in yellow-green.
- Contains no carcinogenic dyes. Safe to use and dispose.

USE INSTRUCTIONS:

Add **RWT-2000GY** at the rate of 2.5 ounces per gallon. Product concentration can be monitored by color level, conductivity or nitrite titration. Spent solutions are biodegradable and non-toxic. RWT-2000GY does not contain ethylene glycol. RWT-2000GY is compatible with antifreeze solutions (ethylene or propylene glycol based).

TECHNICAL DATA

pH (use level).....	11
Color.....	yellow-green
Odor.....	Mild
Solubility.....	Complete
