TY-GLOSS

TV Transmitter Cooling System Descaler

Chemistry designed for use in water-cooled television transmitters to remove scale and prevent efficiency loss.

BIODEGRADABLE

TY-GLOSS is a premium quality, no-VOC, biodegradable solution specially designed for descaling TV transmitter cooling systems.

- Safe on multiple surfaces including steel, copper, brass, aluminum, plastic, rubber and glass.
- Designed for water cooled TV transmitters. Refer to RCA Technical Bulletin dated March 10, 1970 concerning the TTU-30A Transmitter, TB-99-37, page 4.
- Prevents the formation of scale which leads to air bubbles and burn spots.
- Also cleans glass flow meters.
- Highly effective in the removal of scale, resulting in maximum transmission efficiency.
- Rinses easily with water.

USE INSTRUCTIONS:

TY-GLOSS can be added at the rate of 2 gallons per 30 gallons of cooling system capacity. The resulting solution is circulated for 1 to 2 hours then drained out. Flush the system with fresh water to remove any residual before refilling the system for operation.

TECHNICAL DATA:

pH(as is).....1
Appearance.....Clear liquid
Rinsability.....Excellent
