TY-SPRAY Liquid Chisel

Chemistry designed for spray cabinets and automatic wash systems. Formulated to attack dirt, oil and heavy grease.

SAFE ON ALL METAL.

Liquid Chisel is our premium liquid detergent additive for use in spray cabinets and automatic wash systems where heavy carbon removal is a concern.

- Safe on multiple metal surfaces including aluminum and alloys.
- Safe on most painted surfaces, plastic or rubber parts.
- Attacks and removes carbon, heavy grease, lube oils and soils.
- Controls foam build-up at operating temperatures above 135° F.
- Works with all TY-SPRAY alkaline detergents to increase carbon deposit penetration for improved removal.

USE INSTRUCTIONS:

TY-SPRAY Liquid Chisel can be used at 1 gallon per 100 gallons of hot water. Simply add directly to spray washer sump and operate the pump to disperse. The temperature recommended for cleaning is 135° to 190° F. Must be used in conjunction with an alkaline detergent such as TY-SPRAY Maximum Powder or Elektra-Kleen.

TECHNICAL DATA:

pH (use dilution).....near neutral
Color.....Clear
Rinseability.....Excellent
Odor.....Negligible
