TY-SPRAY NO-FOAM

**Chemistry designed for spray cabinets and automatic wash systems.
Formulated to control foam at operating temperatures.**

SPRAYWASH DEFOAMER.

NO-FOAM is our concentrated liquid, non-silicone, foam controlling agent for use in spray cabinets and automatic wash systems where foam control is mandatory.

- Prevents foam build up at temperatures above 135° F.
- Designed with no residue causing silicone for the prevention of paint adhesion or fish-eye problems.
- Highly concentrated formula that requires low usage amounts.
- Proven effective in oil laden and/or detergent laden systems.

USE INSTRUCTIONS:

TY-SPRAY NO-FOAM is effective at a level of 0.02% to 0.05% of the system water for most applications. Most 150 to 300 gallon spraywash machines can use **TY-SPRAY NO-FOAM** at a level of 1/2 cup at a time while the unit is running, until the desired foam control level is achieved.

TECHNICAL DATA:

pH(as is).....Essentially neutral
Color.....Clear
Rinseability (with water).....Excellent
