Tysol Q 138

Concentrated, heavy-duty, foaming, liquid, alkaline presoak for use in car, truck, bus, farm and construction equipment wash applications.

Tysol Q 138 is a premium liquid alkaline, foam detergent for use in automatic vehicle washing systems or manual wash operations. This product is non-hazardous and biodegradable.

- Quickly removes dirt and oily soil from both painted and unpainted surfaces.
- Attacks and destroys carbon, heavy grease, lube oils and soils.
- Built in water conditioning and flash rust corrosion inhibitors.
- Leaves no residue after rinsing. Surface dries spot free.
- Generally safe for disposal to sewage treatment facilities.

USE INSTRUCTIONS:

Tysol Q 138 can be used at 1 to 3 ounces per 1 gallon of hot water for most pressure wash systems. For use in automatic vehicle washing systems where foaming is required, increase the air injection to a range of 40-60 psi. Do not allow product or use solution to dry on surfaces before rinsing. The wash solution is free rinsing resulting in no residue when rinsed properly.
